

# Career Opportunities

NASA Goddard Space Flight Center is seeking qualified candidates in the fields of science, engineering and administration. We are happy to say we currently have jobs to fill!

At NASA Goddard Space Flight Center we have world-class scientists, including a recent Nobel prize winner! Our unique mission is to enable earth science, space science and technology to try to answer the big questions:

- How did the universe begin?
- How are the universe and the solar system evolving?
- How and why is the Earth changing?
- Are we alone?

NASA Goddard Space Flight Center is continually embarking on great scientific missions and we need fresh ideas! Start your career by building a bright future for yourself at NASA, recognized as one of the best places to work in the Federal government in 2009. The opportunities are "out of this world!"

Here is a sampling of some of the current science positions we're looking to fill:

[Entry-Level Scientist GS 12/13](#)

[Entry-Level Scientist/Computer Engineer GS 12/13](#)
